## 🔗 DPG Standard Questionary

This document contains the set of questions that are collected in the application form at [app.digitalpublicgoods.net](https://app.digitalpublicgoods.net) and used to assess each of the indicators set forth in the DPG Standard.

## GENERAL INFORMATION

About your digital solution. Please ensure that your details and code are available in English so that our reviewer team can assess the application properly.

### Solution name

Please enter the full name of your digital solution. This will be listed on the registry if your application is accepted.

### Aliases (if any)

Please mention any acronyms or aliases used to refer to your digital solution. Use commas to enter multiple names.

### Solution category

Please select one or more of the four categories that your digital solutions belong to (Most solutions belong to only one category)

- Open Software
- Open Content
- Open Data
- Open AI Model

## Short description

Please write a tweet-length description of the solution. If your application is approved, this will be reflected on the public DPG registry.

## Website

Please provide link(s) to the website or webpage of your digital solution.

## Alternate email address

Please provide us with an alternate email address (separate from the one used to register on this app). This will give us an additional way to contact you in case emails to the registered email address bounce back.

## Where is your solution's source hosted?

Please provide link(s) to access the source for your code, data, content or AI model. This could be an open repository, API, library etc.

Indicator:	Description:	DPG Standard Assessment Questions:
1. SDG Relevance	Your digital solution must demonstrate relevance to one or more <a href="#">Sustainable Development Goals</a>	<ul style="list-style-type: none"> <li>Which SDGs is your solution relevant to?* Select SDG/s that are MOST relevant to your solution from the list below.</li> <li>How is your solution relevant to each SDG you've selected above?* Each SDG has detailed targets that you can learn more about at the <a href="#">SDG tracker</a>. State in a couple of sentences the relationship between your solution and selected SDG(s)'s targets. If you have selected more than one, you will have to establish the relationship for each of them.</li> </ul>
2. Open Licensing	Your digital solution must use an approved open license.	<ul style="list-style-type: none"> <li>Which open license(s) is/are used by your solution? Please <a href="#">refer here for the list of approved open licenses</a>. If you do not currently use one of the approved licenses, your solution cannot be approved as a DPG.</li> <li>Provide evidence of use of the selected open license(s).* Please provide link(s) to public pages where the license(s) selected</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
		above are hosted for this project. This could be a license file in GitHub repository or a public URL on the project website.
3. Clear Ownership	The organisation that owns this digital solution must be clearly defined.	<ul style="list-style-type: none"> <li>• Who owns this digital solution?* If there is no formal organization associated with the solution, please enter names of the people who own this solution.</li> <li>• Provide evidence(s) of ownership.* Please provide link(s) to the copyright, trademarks, or publicly available ownership documentation for the digital solutions. It could be a webpage that clearly defines who owns the digital solution. Terms of Service may also indicate the ownership of the digital solutions. Additional legal documentation that provides supporting information will strengthen your application. Digital solutions owned by a parent organisation, could highlight the digital solutions on their website to strengthen the application.</li> <li>• Type of organisation that owns the solution: Please select the one that is most applicable to your solution.</li> <li>• Where is the owner based?* Please select the country where the organization is legally established or registered.</li> <li>• Do you own all of the code, content and/or data in this solution?* For open content collections and open datasets, please indicate whether all of the content/data is</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
		<p>owned/licensed by the owner indicated above. For open software, please indicate if you own the code copyright. For Open AI systems, please specify if both the training data and source code are either owned by the project or properly licensed for open use.</p> <ul style="list-style-type: none"> <li>• [If No] Do you have the right to redistribute this data, content or code?* Provide evidence to demonstrate the right to reproduce and/or distribute all of the content or datasets included in the solution. Acceptable evidence includes licensing agreements for copyright work or evidence of public domain for copyright-free work. For code, this could be a Contributor License Agreement.</li> </ul>
4. Platform Independence	<p>If your digital solution has mandatory dependencies that create more restrictions than the original license, proving independence from the closed component(s) and/or indicating the existence of functional, open alternatives that can be used without significant changes to the</p>	<ul style="list-style-type: none"> <li>• Which are the core technologies your solution depends on? Please provide a list of the core dependencies required to install and/or use the solution. This can include the main dependencies such as programming languages, frameworks, databases, and similar.</li> <li>• Does this solution use any closed components that create proprietary dependency?* Yes or No. You will be required to answer the next question if you select Yes. For AI systems, please consider dependencies for the code, the model and the data.</li> <li>• How can these closed component(s) be replaced with open alternative(s)? Please provide a list of the active</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
	core product is required.	open alternatives for the closed component(s) and demonstrate that these close component(s) can be replaced with those open alternatives with minimal configuration changes, without requiring a major overhaul of the entire system. This requirement can be best answered by a technical member of your team. Leave this blank if the above answer is No.
5. Documentation	Your digital solution must have strong documentation. The documentation should allow a technical person unfamiliar with the solution to launch and run the digital solution themselves.	<ul style="list-style-type: none"> <li>• Where is your solution's documentation?*            Please provide the link(s) to your solution documentation:           <ul style="list-style-type: none"> <li>○ For <b>software</b>, documentation should include developer docs, technical architecture, user guides, etc.</li> <li>○ For <b>data</b>, documentation should include a data dictionary, metadata, and background information, including data sources, access instructions, etc.</li> <li>○ For <b>content</b>, documentation should include all relevant/compatible apps, software, or hardware required to access the content collection, and instructions regarding how to use it.</li> <li>○ For <b>AI systems</b>, documentation should include <a href="#">the following checklist</a>, which can be presented in a model card, datasheet, or any other format.</li> </ul> </li> </ul>
6. Mechanism for Extracting Data	If your solution collects, uses or	<ul style="list-style-type: none"> <li>• Does your solution collects, uses or generates non-PII data and/or</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
	<p>generates non-PII data and/or content, then there must be mechanisms for extracting or importing non-PII data from or into the system in a non-proprietary format.</p>	<p>content?*</p> <p>Yes or No. You will be required to answer the next question only if you collect, use or generate non-PII data and/or content.</p> <ul style="list-style-type: none"> <li>Describe the mechanism for extracting or importing non-PII data from or into the system in a non-proprietary format. Please provide a detailed description of how the non-PII data can be imported or exported into non-proprietary formats such as CSV/XML/JSON etc or via exposing the non-PII data through APIs.</li> </ul>
7. Privacy & Applicable Laws	<p>Your digital solution must comply with relevant privacy, domestic and other applicable international laws.</p>	<ul style="list-style-type: none"> <li>Provide a list of relevant privacy, domestic and other applicable international laws your solution complies with.* Please enter a list of the relevant laws that your digital solutions complies with such as General Data Protection Regulation (GDPR), Indian IT Act, Persons with Disabilities Act 2020, Canadian Disabilities Act, Americans with Disabilities Act of 1990, etc.</li> <li>Provide evidence(s) of adherence with the laws mentioned above.* Please provide link(s) to the privacy policy, terms of service or other relevant legal documentation as demonstrate adherence</li> </ul>
8. Standards & Best Practices	<p>Your digital solution must comply with relevant standards, best practices and/or principles.</p>	<ul style="list-style-type: none"> <li>Provide a list of the open standards your solution adheres to and demonstrate adherence.* You may provide link(s) to a validator, open test suite, etc to demonstrate adherence. Here is a</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
		<p>list of <a href="#">open standards</a> that you may find helpful.</p> <ul style="list-style-type: none"> <li>Provide a list of best practices &amp; principles your solution adheres to and demonstrate adherence.* You may provide link(s) to a validator, open test suite, etc to demonstrate adherence. Here is a list of <a href="#">best practices</a> that you may find helpful.</li> </ul>
9 A. Data Privacy & Security	<p>If your digital solution allows implementors to collect, store and/or distribute PII data (personally identifiable information), then you must demonstrate how the privacy, security and integrity of this data can be ensured. For AI systems, also consider if the training data includes PII data.</p>	<ul style="list-style-type: none"> <li>Does your solution allow the collection / storage / distribution of PII data?* Please select the option that is applicable to your solution. PII data can NOT be collected NOT stored and NOT distributed. PII data can be collected but NOT stored and NOT distributed. PII data can be collected and stored but NOT distributed. PII data can be collected and stored and distributed.</li> <li>What are the types of data that can be collected / stored / distributed? Please list the types of PII data. Example: Name, Email, etc.</li> <li>How does your solution ensure data privacy &amp; security? Please demonstrate how the solution can ensure the privacy, security and integrity of PII data and the steps taken to prevent adverse impacts resulting from its collection, storage and distribution.</li> </ul>
9 B. Inappropriate, Misleading & Illegal Content	<p>If your digital solution enables the collection, storage or distribution of</p>	<ul style="list-style-type: none"> <li>Does your solution allow the collection / storage / distribution of content?* Please select the option that is applicable for your solution.</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
	<p>content, then you must have mechanisms for identifying inappropriate, misleading, and/or illegal content such as child sexual abuse materials, in addition to processes for detecting, moderating, reporting, and removing such inappropriate, misleading, or illegal content.</p>	<p>Content is NOT collected NOT stored and NOT distributed.</p> <p>Content is collected but NOT stored and NOT distributed.</p> <p>Content is collected and stored but NOT distributed.</p> <p>Content is collected and stored and distributed.</p> <ul style="list-style-type: none"> <li>• What are the types of content that can be collected / stored / distributed? Please list the types of content.</li> <li>• How does your solution handle inappropriate, misleading and illegal content? Please describe (1) the mechanisms for identifying inappropriate, misleading and illegal content and (2) the processes for detecting, moderating, reporting and removing inappropriate/ misleading / illegal content. Please include the average response time for assessment and/or action.</li> </ul>

Indicator:	Description:	DPG Standard Assessment Questions:
9 C. Protection from Harassment	<p>If your digital solution facilitates interactions with or between users or contributors there must be a process for users and contributors to protect themselves against grief, abuse, and harassment. The project must have system(s) to address the safety and security of underage users</p>	<ul style="list-style-type: none"> <li>• Does your solution facilitate or enable interactions with or between users and/or contributors?*</li> </ul> <p>Yes or No. Please select the option that is applicable for your solution. You will be required to answer the next question if you select Yes.</p> <ul style="list-style-type: none"> <li>• How does your solution enable users and contributors to protect themselves from harassment?</li> </ul> <p>Please describe (1) policies such as a code of conduct and processes users and contributors can use to protect themselves and (2) processes that address the safety and security of underage users.</p>

### Scale of Solution:

Additional information highlighting the extent and scale of your solution's implementation and success.

- Where is this solution actively deployed?: *Please select one or more countries.*
- Who else is using your solution?: *Please enter any other organization, multilateral, government, or body that has adopted your solution and if possible specify at what scale or for what use case it has been implemented.*
- Is your solution designed to support different languages or regions?: *Please indicate if the solution has infrastructure in place or is otherwise designed to be multilingual.*
- Available languages: *If present, enter the languages in which the solution is available.*
- Has your solution been part of any of these programs?: *Please select from the options below. This could be current or former participation.*
- Highlights/ Learn more: *Enter a list of links to public posts, use cases of the solution, or other prominent material to be showcased or that you would like us to know about. For example, links to videos, demos, how it works, visuals, etc.*
